

Can Take You Places

Curriculum Components

Transport students into the heart of mathematics through travel-related career applications, fast-paced videos, lesson plans and games. Algebra readiness may never be the same.

Math Can Take You Places illustrates everyday applications related to five focus areas: domain/range, equivalency, measurement, patterns and problem solving.

INDEPENDENT PROJECT EVALUATION RESULTS

According to an independent evaluation conducted by The University of Texas at Dallas, “instruction using the **Math Can Take You Places** materials, lessons, videos and other resources made a statistically significant difference on the achievement of students who participated.” The full executive summary is included on the **Math Can Take You Places** CD.
